## Objective

A Computer Science Engineering graduate seeking an entry-level position to leverage my programming skills, problem-solving abilities, and passion for technology in a dynamic and innovative environment.

## Education

**B.E in Computer Science**                                                                                           *Mangaluru, India*
St Joseph Engineering College                                                                                      *Dec 2021 - May 2025*

**Pre University**                                                                                                        *Mangaluru, India*
Govindasa PU College                                                                                                 *Jun 2019 - May 2021*
- Major in **Computer Science**.

**SSLC (Class 10th)**                                                                                                   *Mangaluru, India*
Delhi Public School                                                                                                      *Mar 2018 - Apr 2019*

## Internships

**Zephyr Technlogies**                                                                                                       *On-site*
*Web Developer Intern*                                                                                               *Oct 2023 - Nov 2023*
- Successfully completed an internship focusing on web development. Worked on a project that enhanced my front-end development skills, involving HTML, CSS, JavaScript, and responsive design techniques.
- Gained hands-on experience with modern web development tools and frameworks, contributing to the development of user-friendly and visually appealing web interfaces.

**Salesforce**
*Salesforce Administrative Virtual Internship*                                                                       *Jan 2024*
- Successfully finished Salesforce Administrator Internship, gaining hands-on experience in Salesforce configuration, data management, and administrative tasks.

## Skills

|   |   |
|---|---|
| **Languages** | JavaScript \| Python \| HTML/CSS \| C/C++ \| Java |
| **Frameworks/Tools** | TKinter \|React \|MongoDB \|Git \|Linux |
| **Soft Skills** | Problem-solving \| Time Management \| Adaptability \| Leadership \| Communication |

## Projects

**Portfolio**                                                                                                                 *2024*
Personal Website                                                                                               *HTML\| CSS \| Javascript*
- Developed a responsive portfolio website using HTML, CSS, and JavaScript, showcasing projects and skills. Utilized modern design principles to create an engaging user experience, demonstrating proficiency in front-end development.

**Blood Managment System using tkinter**                                                                              *2023*
DBMS Project                                                                                                                *Tkinter*
- Developed a comprehensive Blood Management System as part of a database management project, utilizing Python's Tkinter library for the graphical user interface.

**Art Gallery**                                                                                                               *2023*
Web development Project                                                                                       *HTML,CSS,Javascript,PHP*
- Designed and developed an Art Gallery website using HTML, CSS, JavaScript, and PHP.
- Implemented dynamic features to showcase artwork, enhancing user engagement and visual appeal.

**WeatherWave**                                                                                                               *2024*
Weather-App(API Based)                                                                                                        *React*
- Designed and developed a responsive weather-app website using React and the Open-Meteo API
- This website displays real-time weather data, temperature, and wind speed for multiple countries.
